Work Experience

Full Stack Developer Intern

Qwicksoft Solutions Pvt. Ltd.

Jul’25 – Sep’25

3m

Chennai

Engineered a comprehensive React Native mobile application for freight management, emphasizing responsive and user-centric UI development. Implemented real-time API integrations and backend connectivity to enable efficient tracking, logistics coordination, and data synchronization across modules, ensuring a smooth and scalable user experience.

Jr. Java Developer and Scrum Master

Brainmint Chennai

Feb’25 – May’25

4m

Chennai

Developed and optimized Java backend modules for streamlined performance. Contributed to agile sprints, facilitated stand-ups, and coordinated planning. Ensured team velocity and communication in a fast-paced project environment.

Projects

Sahayak AI: LLM-Powered Teaching Assistant

AI Developer

Developed an LLM-powered mobile app for rural teachers, generating worksheets and lesson plans. Integrated Gemini API with Python for dynamic content, including prompt design and multi-language support. (Python, Gemini LLM, React Native)

Weblite: CLI Static Site Generator

Developer

A CLI-powered static site generator in Python/YAML for HTML/CSS generation. Features included theme customization, component reuse, and GitHub Pages deployment. (Python, YAML, HTML/CSS).

She Shield

React Native Developer

SheShield is an AI-powered safety app for women that detects harassment, enables voice-activated SOS alerts, tracks rides and routines for risks, and ensures privacy with on-device processing and encryption.
